

Welcome to the June edition of the Inteltek NEWSLETTER. It contains news, facts and information to help you to obtain the best out of our products and services.

Our first issue contains information on:

## Product Information June 2011

- **Pervasive Displays Ultra-low Power E-Paper Panels AVAILABLE NOW**
- **Micro Crystal introduces CM7V-T1A thin ceramic package kHz crystal**
- **Fujitsu Expands FM3 Family of 32-bit MCUs with ARM® Cortex™-M3 Core**

Product series: E-Paper Panels

### **Pervasive Displays Ultra-low Power E-Paper Panels up to 10.2" AVAILABLE NOW**

These E-Paper panels are one of the most power efficient, easy to read, industrial purposed reflective e-Paper displays on the market. By combining the high resolution of a TFT backplane and the dependability of E Ink technology, these displays offers its user the freedom to display any image with excellent definition and contrast. The small and thin form factor makes it easy to design it into a variety of applications.

Product series: Quartz

### **Micro Crystal introduces CM7V-T1A thin ceramic package kHz crystal**

Micro Crystal's newest 32.768 kHz quartz crystal, the CM7V-T1A, sets new standards for thin profile design. The CM7V-T1A has a high-performance ceramic package with metal lid. Designed for portable and other applications where miniaturization is critical, this new crystal has a package height of just 0.65mm and a footprint of 3.2 x 1.5mm.
