

Neoway V16 Emergency Light

Product Overview

When a vehicle breaks down or encounters an accident, simply switch on the Neoway V16 Emergency Light and place it on the roof of the car. The flashing warning signal alerts vehicles behind, helping prevent secondary accidents. At the same time, the device automatically sends location information to the traffic police platform, improving rescue response and handling efficiency.

Why Do You Need a Neoway V16 Emergency Light

What if you can't set up a warning triangle on the highway?

What if a secondary accident occurs while placing the triangle?

What if rescuers cannot locate you?

What if precious rescue time is lost?

Neoway V16 Emergency Light — safeguarding your journey, ensuring safety on the road.
